

Commercial Carpenter

A stable, established, and well-respected Southwestern Ohio company seeks a skilled Carpenter with flexible skills, experience in general carpentry, and talent in finish work. This position combines high-level, hands-on tool work with project coordination and customer contact; therefore, strong communication, customer orientation, and team skills are required.

Beneficial for this position, though not required, are supervisory skills, electrical knowledge, and/or door and hardware experience; low voltage experience is a plus. Demonstrated broad carpentry skills and professional approach to project management are essential, as is the flexibility to work occasionally sporadic hours or schedules, including evening/night hours and occasional overtime, dependent on individual project needs.

Compensation and benefits are above average, and we may offer a company truck for job use. Additionally, in over two decades of being in business, we have historically been able to offer ongoing, full-time work hours all 12 months of the year.

We are conducting this job search in confidence. Further details about this position and our company will be provided during the selection process. If you are interested in being considered for this opportunity, please submit your resume and a description of your skills to Irene@oliverjamesllc.com, indicating "Carpenter Position" in the subject line.
